Variable Fuel Surcharge

As from 25th July 2022 our fuel surcharge will be 21.7%.

As you will appreciate the cost of fuel is out with our control and any increase or decrease in ppl can have a significant impact on business operating costs.

Burns Express varies the rate of fuel surcharge on your account so that as fuel prices increase and decrease, so does the fuel rate applied to your account.

For every 1p reduction or increase on a litre of fuel, we will apply a decrease or increase to our surcharge of 0.30%.

example of changes to the variable fuel surcharge:
