

## Environmental Policy Statement

The Company aims to actively reduce the impact of our operations on the environment through promoting sustainability and environmental awareness at all levels and making 'Green' choices where possible.

Key areas currently targeted are:

- Staff awareness in minimising waste and encouraging recycling
- Investment in new vehicles with the most fuel efficient engines
- Investment in longer length trailers thereby reducing our carbon footprint
- Investment in new energy efficient Office / IT equipment
- Renewal programme in our warehouse and office areas replacing old lighting with energy efficient LED lighting
- Using technology to ensure our vehicles are routed in the most efficient manner and to maximise loads.
- Driver training to encourage fuel efficiency and to minimise wear on tyres etc together with the use of in built vehicle technology to monitor this.

The directors of Burns Express Freight Ltd are committed to reducing our environmental impact and will continually assess and consider advantageous practices and comply with all legalities.
